*"Even the most driven Type-A otherwise successful executives can overnight find themselves in an situation that they haven't found themselves in before: unemployed, poor economic climate, and a personal network that has been neglected. The dangers of such of place can be devastating, including loss of self-confidence, drive and ultimately a painful personal spiral downwards. This is where I found myself. Lee was instrumental, through his one-on-workshops, insightful discussions, and positive support, in helping me to re-discover what is important and to understand my strengths, and ultimately regain the all-important confidence to succeed. In my case, my experience with Lee not only helped me to get a great new challenging position, but also to put that in perspective of my life goals and quality of life. I now have a framework to build my career within the goals of my life aspirations." - CGG, Ottawa*
